BIO-PERC™

BIOLOGICAL REMEDIATION TABLETS

BIO-PERC™ BIOLOGICAL REMEDIATION TABLETS

GENERAL INFORMATION

Bio-Perc biological remediation tablets rejuvenate failing wastewater treatment systems by reducing or eliminating organic buildup in distribution lines and disposal processes. Formulated for use in all residential and small commercial treatment systems, Bio-Perc tablets enhance the operational life of leach fields, surface sand filters, subsurface sand filters, sand trenches, cesspools, mounds, low pressure distribution systems, evapotranspiration beds, constructed wetlands, septic tank effluent pump (STEP) systems, and any other type of system prone to failure from the buildup of organic solids. When incorporated into a regular maintenance program, Bio-Perc tablets restore failing wastewater treatment systems to proper operation and prevent the failure of new systems.

Sand filters and soil-based disposal systems often receive more organic material than they can oxidize. Excessive organic loading reduces system capacity and ultimately leads to the total failure of the treatment system. Chemical shock treatments or mechanical remedies, such as blasting the tile field with high-pressure air or water, are expensive and the benefits last only a short time. Bio-Perc tablets provide continuous, long-term treatment and are safe, easy and economical to use.

Bio-Perc tablets add billions of beneficial microorganisms to accelerate the biological digestion that naturally occurs in wastewater disposal systems. Dissolving in direct proportion to the incoming flow rate, Bio-Perc tablets can be dosed by any gravity-flow feeder or added directly into a distribution box, pump station or dosing chamber. Providing continuous treatment on demand, Bio-Perc tablets allow failing treatment systems to function as originally designed for only a fraction of the replacement cost.

ADVANTAGES

- 1 Environmentally safe when used as directed
- 1 Protects against premature system failure
- 1 Doses automatically based on flow rate
- 1 Effective for all effluent disposal systems
- 1 No excavation or heavy equipment required
- 1 No disruption of landscaping
- 1 Economical and easy to use

SPECIFICATIONS

Tablet Size	2 ⁵ / ₈ " diameter, 1" thick
Approx. Tablet Weight	5 oz. (140 grams)
Approx. Tablet Density	125 lbs./ft ³
Active Ingredient	Select bacterial cultures
Bacteria Count	220 billion/pound
Inert Ingredients	Dissolve rate stabilizers
Appearance and odor	Bronze tablet with mild odor
E.P.A. Designation	Non-Hazardous

CAUTION

Bio-Perc biological remediation tablets are a proprietary, non-hazardous bacterial additive for wastewater treatment. Do not use this product in a manner inconsistent with its labeling. Do not contaminate food, feed or potable water with this product. Avoid contact with skin, eyes, mouth, respiratory system and clothing. Do not mix with acids or alkali compounds. Use gloves and eye protection when handling tablets. Avoid inhalation of dust or vapors. Keep out of the reach of children. Extreme heat or extreme cold will affect product performance. Store only in sealed original container in a well-ventilated area. Do not handle Bio-Perc tablets or feed tubes without first contacting your local distributor and obtaining specific instructions for usage, handling and storage. Exercise care when removing tablets from container or filling feed tubes to prevent moisture contamination. Read the product container label carefully prior to use. Do not reuse empty container.

Bio-Perc biological remediation tablets are available from your local Norweco dealer or distributor in conveniently packaged, DOT approved and child resistant 10 lb. and 25 lb. resealable polyethylene pails.
